Summary

Data Center and IT Infrastructure Engineer with 9+ years of experience in financial trading environments. Specializing in high-performance infrastructure, low-latency architectures, software-defined networking (SDN), and Linux/FreeBSD systems automation.

Proficient in Linux/FreeBSD operating systems, TCP/UDP transport protocols, IP network routing, Python scripting, and Shell automation, with a continuous drive for problem solving and emerging technologies.

Work Experience

Japannext Co., Ltd.

Tokyo, Japan

DATA CENTER ENGINEER (CO-MANAGER)

Oct. 2014 - Present

- Collaborated with project managers and internal stakeholders to set up datacenter rooms and server racks for internal and client use, achieving room readiness one week ahead of schedule.
- Implemented rack-level PDU power monitoring with the datacenter team, achieving a 50% improvement in workload power balancing and enhanced capacity planning for facility power and space.
- Automated datacenter monthly reporting for executive management using open-source tools, eliminating manual reporting overhead and boosting operational efficiency.
- Deployed an online datacenter inventory system for infrastructure hardware and consumables (cables, SFPs/QSFPs, patch panels), drastically improving inventory tracking and hardware capacity planning.
- Partnered with the Unix infrastructure team to deploy an open-source hardware inventory system integrated with system monitoring, significantly streamlining hardware discovery, monitoring, and capacity planning.
- Deployed enterprise storage using the Dell PowerScale (Isilon) platform across teams, achieving a 50% increase in server throughput compared to legacy storage and maximizing shared storage efficiency.
- Led an end-to-end datacenter server migration for a critical internal project facing power capacity constraints. Coordinated cross-functional teams, formulated risk mitigation plans, and executed the migration with minimal downtime, delivering ahead of schedule within two weeks and enabling 50% expansion capacity in the new room.

Keio University - JICA JST Indo Project

Japan

RESEARCH ASSISTANT

Apr. 2011 - Sep. 2014

- Researched energy efficiency and power consumption in peer-to-peer (P2P) networks.
- Applied game theory models to network and information dissemination using probabilistic gossip protocols.
- Published peer-reviewed papers in international journals and conference proceedings based on research outcomes.

Keio University

Japan

SYSTEM ADMINISTRATOR

Oct. 2007 - Sep. 2014

- Managed campus and lab server and network infrastructure (DNS, email, web servers, routers, and switches) in coordination with lab managers, unifying administrative workflows for higher operational reliability.

Trainings

2024	AI Infrastructure and Operations Fundamentals , Coursera (NVIDIA)	Online
2024	Foundations of Project Management , Coursera (Google)	Online
2023	Generative AI for Everyone , Coursera (DeepLearning.AI)	Online
2023	Mathematics for Machine Learning and Data Science , Coursera (DeepLearning.AI)	Online
2023	AWS Cloud Practitioner , Coursera (AWS)	Online
2022	Introduction to Time and Frequency Measurement , National Physical Laboratory (NPL), UK	Online
2022	Risk Management , Coursera (New York Institute of Finance)	Online
2022	Machine Learning , Coursera (Stanford University)	Online
2022	Fundamentals of Equities , Coursera (Interactive Brokers)	Online
2020	Introduction to Metrology , National Physical Laboratory (NPL), UK	Online
2020	Data Science Python Track , DataCamp	Online

2019	NFV Acceleration: An Introduction to OPNFV , edX (Linux Foundation)	Online
2019	Introduction to Open Source Networking Technologies , edX (Linux Foundation)	Online
2010	Introduction to NetFPGA , Stanford University	Tokyo, Japan

Writing

Energy Consumption in Peer Assisted CDN

*International Journal of Advanced
Research in Computer Science
(IJARCS) Vol.4 No.9*

AUTHOR

Aug. 2013

- Compared peer-assisted (edge) CDN energy consumption versus traditional CDN architectures.

Assessing The Dynamics of BitTorrent Swarm Topologies Using The Peer Exchange Protocol

*IEICE Transactions on
Communications (Special Issue on
Information Network Science,
Vol.E95-B, No.05)*

AUTHOR

2012

- Inferred the dynamics of BitTorrent swarm topologies using the Peer Exchange (PEX) protocol.

A Temporal View of The Topology of Dynamic BitTorrent Swarms

*IEEE INFOCOM Workshop on
Network Science for
Communication Networks (DOI:
10.1109/INFCOMW.2011.5928939)*

AUTHOR

2011

- Analyzed temporal evolution and graph topology of dynamic BitTorrent swarms.

Education

Keio University

Tokyo, Japan

PH.D. IN MEDIA AND GOVERNANCE

Graduated Oct. 2014

- Researched peer-to-peer (P2P) network topologies and energy-efficient content delivery networks (CDNs).
- Supervisors: Prof. Jun Murai, Prof. Hiroshi Kusumoto, Dr. Kenjiro Cho, and Prof. Rodney Van Meter.

Institut Teknologi Bandung (ITB)

Bandung, Indonesia

M.T. (MASTER OF TECHNOLOGY IN ELECTRICAL ENGINEERING)

Graduated Oct. 2004

- Designed and measured IPv6 campus network deployment and performance.

Institut Teknologi Bandung (ITB)

Bandung, Indonesia

S.Si. (BACHELOR OF SCIENCE IN PHYSICS)

Graduated Oct. 2000

- Researched data assimilation methods in 1D hydrodynamic models.
